

SAJID REHMAN

Final-Year BS IT Student · Computer Vision · NLP & Generative AI

sajidkhan47795@gmail.com | +92-303-8047795 | Lahore, Pakistan | [LinkedIn](#) | [GitHub](#) | [Portfolio](#)

PROFESSIONAL SUMMARY

Final-year BS Information Technology student who has independently built and shipped 8+ AI/ML projects spanning Computer Vision, NLP, and Generative AI — including real-time YOLOv8 object detection, VGG16/ResNet medical-imaging classifiers, and LangChain/GPT-4 RAG applications, all documented on GitHub with live demos. Combines coursework with freelance client work and an AI training program to apply concepts in real, deployed systems. Completed the Stanford/DeepLearning.AI Machine Learning and Deep Learning Specializations. Seeking an entry-level AI/ML Engineer, Computer Vision, or NLP internship/role.

TECHNICAL SKILLS

- **Languages:** Python, SQL, JavaScript, Bash
- **Machine Learning:** Scikit-learn, XGBoost, LightGBM, Random Forest, SVM, Logistic Regression
- **Deep Learning:** TensorFlow, PyTorch, Keras — CNNs, RNNs, LSTMs, Transformers, BERT, DistilBERT
- **Computer Vision:** OpenCV, YOLOv8, VGG16, ResNet, EfficientNet — object detection, image classification, ONNX
- **NLP & Gen AI:** LangChain, HuggingFace Transformers, OpenAI API (GPT-4), RAG, Prompt Engineering, spaCy, NLTK
- **Deployment:** FastAPI, Streamlit, Docker, AWS, Vercel, Render, REST APIs, GitHub Actions
- **Data & Tools:** Pandas, NumPy, Matplotlib, Seaborn, Git, Jupyter, PostgreSQL, SQLite, ChromaDB, Pinecone

EXPERIENCE

Freelance AI/ML Developer — Self-Employed (Fiverr)

2024 – Present

- Delivered LLM chatbots, YOLOv8 object detectors, and predictive ML models for international clients, deploying via FastAPI and Docker on AWS and Render, with consistently positive client feedback.
- Built reusable TensorFlow and Scikit-learn pipeline templates that standardized preprocessing, training, and REST API deployment across NLP and computer-vision projects.
- Delivered NLP solutions (sentiment analysis, text classification, named-entity recognition) for e-commerce, healthcare, and SaaS clients using HuggingFace Transformers and LangChain.

AI Intern — NLP & Computer Vision — Suvidha Foundation (Remote)

2024

- Built automated Python (Pandas, NumPy) data-cleaning pipelines across multiple NLP and computer-vision datasets, reducing preprocessing time for the team.
- Evaluated model reliability using Scikit-learn metrics (F1, AUC-ROC, precision/recall) to support model-selection decisions.

AI/ML Training Program — Saylani Welfare Trust (SMIT), Peshawar — Part-time

Jan 2023 – Jan 2026

- Completed applied coursework in NLP and computer vision (training, evaluation, deployment) using TensorFlow, PyTorch, and OpenCV alongside undergraduate studies.
- Built applied ML projects in Python (Pandas, Scikit-learn, Matplotlib) forming the foundation for personal AI/ML projects shipped since.

KEY PROJECTS

Pneumonia Detection — Chest X-ray Classifier [GitHub ↗](#)

TensorFlow · Keras · VGG16 · ResNet · OpenCV · Streamlit

- Fine-tuned VGG16 and ResNet CNNs with data augmentation and hyperparameter tuning for chest X-ray classification (normal vs. pneumonia); deployed as a live Streamlit Cloud app.

Real-Time Object Detection — YOLOv8 [GitHub ↗](#)

YOLOv8 · PyTorch · OpenCV · Streamlit · ONNX

- Built a multi-object detection pipeline (image upload + live webcam) benchmarked on COCO; optimized with ONNX Runtime for edge deployment and hosted on Streamlit Cloud.

SmartDineAI — Full-Stack RAG Dining Assistant [GitHub ↗](#)

Next.js · FastAPI · LangChain · RAG · ChromaDB · Vercel · Render

- Built an AI ordering assistant with a Next.js frontend (Vercel) and FastAPI/GPT-4 backend (Render), using a LangChain RAG pipeline over ChromaDB for multi-turn menu Q&A.

AI HR Hiring Assistant — Resume Screener [GitHub ↗](#)

Python · Streamlit · spaCy · LangChain · HuggingFace

- Built an NLP + LLM app that parses resumes and scores candidates against job descriptions to produce a ranked shortlist; presented at Agriculture University Peshawar's Tech Symposium 2024.

BBC News Article Classifier — NLP Pipeline [GitHub ↗](#)

Python · Scikit-learn · TF-IDF · TensorFlow

- Built a multi-class NLP classifier on the BBC News dataset achieving over 95% accuracy, benchmarking Logistic Regression, Random Forest, and a deep-learning model.

LinkedIn AI Assistant — LLM FastAPI Service [GitHub ↗](#)

Python · FastAPI · LangChain · GPT-4 · Docker

- Built a FastAPI microservice that generates LinkedIn replies and summaries via LangChain GPT-4 prompt chaining, noticeably speeding up content drafting in user testing.

EDUCATION

Bachelor of Information Technology — Final Year — Agriculture University Peshawar *Nov 2022 – Expected 2026*

- Coursework: Machine Learning, Deep Learning, Data Structures, Computer Vision, Statistics, Software Engineering.
- Speaker, 'Building Production-Ready AI Models' — University Tech Symposium 2024.

Diploma in Information Technology — National College of Management Science, Peshawar *Jan 2023 – Jan 2024*

CERTIFICATIONS

- Machine Learning Specialization (3 courses) — Stanford University & DeepLearning.AI, 2025
- Deep Learning Specialization (5 courses) — DeepLearning.AI, 2025
- AI Python for Beginners — DeepLearning.AI, 2023
- Data Analytics & Business Intelligence — DigiSkills.pk, 2024

ACHIEVEMENTS & LANGUAGES

- Best AI Project Demo — Agriculture University Peshawar Tech Symposium 2024 (AI HR Hiring Assistant).
- 8+ end-to-end AI/ML projects documented on GitHub: github.com/sajidrehman2
- Languages: English (Professional), Urdu (Native), Pashto (Native), Arabic (Basic).
